

My Canada Life at Work™ in your pocket

We're currently working on finalizing our My Canada Life at Work mobile app. But in the meantime, there's a way to create app-like access to My Canada Life at Work so you can access your plans information anytime, anywhere. Just follow the steps below.

Get on-the-go access to My Canada Life at Work:

1. Download and open the Safari web browser from your iPhone
2. Enter mycanadalifeatwork.com into the address bar and select Go
3. Select the Share icon (the box with an arrow pointing upwards) to open a drop-down menu

4. **Select Add to Home Screen**
5. **Once the Add to Home Screen box appears, select Add**
6. **Access My Canada Life at Work easily and conveniently by selecting the My Canada Life at Work icon on your home screen**

You've now created app-like access to your Plans! We'll let you know as soon as our app is available for download.
